

CLAIMS

1. A box (10) for packaging electronic equipment, characterized in that it is produced from a resistant material and includes at least one identification means (20).

5 2. A box according to claim 1, characterized in that the electronic equipment packaged in the box is an electronic voting machine.

3. A box according to claim 1 or 2, characterized by comprising a body (11) and a cover (12), which fit together to provide sealing for the box.

10 4. A box according to any one of claims 1 to 3, characterized in that the identification means consists of one cut-out (20) provided in at least one of the faces of the cover, so as to permit access to the border (18) of the body (11).

15 5. A box according to any one of claims 1 to 4, characterized in that it has a shape that enables one to stack two or more boxes in the opened and/or closed condition.

6. A box according to any one of claims 1 to 5, characterized in that the box/cover assembly comprises bores or locks (19) and/or slots (17) for receiving seals and/or sealing tapes.

20 7. A box according to any one of claims 1 to 5, characterized in that the inside of the box is provided with internal cradles for accommodating the electronic equipment and other parts that accompany the electronic equipment.

25 8. A box according to claim 7, characterized in that the internal cradles are produced from a material that consists of polyurethane, pollexan, isopor or the like, or is injected onto the box body.

9. A box according to any one of claims 1 to 8, characterized in that the inside of the box is provided with a support for placing a dehumidifier.

30 10. A box according to any one of claim 1 to 9, characterized in that it comprises at least one viewing window (13) located in at least one side (14) of the box.

11. A box according to any one of claims 1 to 10, characterized in that it is manufactured from a thermoplastic material by an injection process.

5 12. A box according to claim 11, characterized in that the thermoplastic material is chosen from polypropylene, polycarbonate, polyethylene, ABS and the like.

13. A box according to claim 11 or 12, characterized in that the thermoplastic material is especially provided with additives for protection against ultraviolet rays.

10 14. A box according to any one of claims 1 to 13, characterized in that it comprises reinforcement structures distributed on the body and on the cover.

15. A box according to any one of claims 1 to 14, characterized in that it comprises holders (16) for being carried.

15 16. A box according to any one of claims 1 to 15, characterized in that it comprises a window in any of its faces, which enables one to see the inside of the box.
